

## Duel Duo Test plan

Check to see if page loads - pass

Test "see all bots" button - fail

Test "draw" button - pass

Test "add to Duo" buttons - pass

Test "remove from duo" button - pass

Test "Duel" button - pass

Test "Play again" button - pass

Test "Won" – adds to loss total – fail

Manually calculated totals on test and "you won" is correct but it adds a win to the loss total.

Test "Lost" – works correctly – pass

Manually calculated totals on "you lost" is correct and adds to the loss total.

Test "Tie" – tie says "You won" adds to loss total – fail

Manually calculated on a "you won" and found a tie. There appears to be no scenario for a tie and it adds the "win" to the loss total.

### Bug report:

1. Load page and click "See All Bots" nothing happens
2. Play game and win Score will call it a loss and increase loss score while win score is always zero
3. Play game with a tie, message will say "You won" and score it as a loss
